

Investigating the Robustness of Disentangled Variational Autoencoders to Adversarial Examples

Sten Sootla¹

Computational Statistics and Machine Learning

Supervised by Dr. Cristina Calnegru and Dr. John Shawe-Taylor

Submission date: 10.08.2018

¹**Disclaimer:** This report is submitted as part requirement for the MSc degree in Computational Statistics and Machine Learning at UCL. It is substantially the result of my own work except where explicitly indicated in the text. The report may be freely copied and distributed provided the source is explicitly acknowledged.

Abstract

Summarise your report concisely.

Contents

1	Introduction	2
2	Related work and background	3
3	Methods	4
4	Results	5
5	Conclusion	6

Chapter 1
